Twin Cities ANSYS User Meeting

Hardware for FEA/CFD

Wednesday, June 29th

3:00-5:00 PM

Sizing, purchasing & configuring hardware for FEA / CFD: Multi-core HPC, GPU's, RAID's, Interconnects and more to be discussed including benchmarks and lessons learned.
Presented by industry maven David Mastel of PADT

Join your fellow ANSYS users in the Twin Cities area for an ANSYS user meeting including technical presentation with handouts.

After the presentation, this informal setting encourages users to exchange experiences with ANSYS features, products, and methods new and old

Meet at 3PM on Wednesday, June 29th at Bryant-Lake Bowl and Theater.

Food and beverage provided! This event is free—parking is available behind the building (lot), as well as street parking on Aldrich, Bryant, and Colfax Avenues.

Hosted by Epsilon FEA and guest, Phoenix Analysis & Design Technologies, the hour long presentation is followed with informal discussions and networking until six o'clock.

Please RSVP to reserve a seat:
